UTILIZATION

A security hardware key *(a USB token with an embedded chip)* to protect access to computer, VPN, and corporate systems operating systems.

It is linked to a mobile application that serves as a security feature *(activation, login)* and breaks the connection when you move away from your computer.

ALLOWS:

- Win and macOS multifactor login

- Multifactor login to VPNs and business systems

- Qualified electronic signature

- Automatic check for security threats on mobile

- Secure communication thanks to BLE encryption

USB TOKEN:

- Includes QSCD chip

- Support for FIDO2 and U2F protocols

- Includes an integrated reader

- It has a control diode and a switch

BITTRON APP

- Supports biometrics and FaceID

- Freely downloadable on Appstore and Google Play

- Includes Talsec security framework

KBC **ERSTE Group** **PPF**

Raiffeisen Bank International **orange™** **INTESA SANPAOLO**

ALL-IN-ONE TOOL FOR SAFE REMOTE WORK

It offers a comprehensive solution for secure remote access and work from home *(Home Office and Remote Work)*.

It reliably covers the basic needs of the employee for secure connection and electronic signature from anywhere.

It offers the highest level of security and meets the requirements of the Cybersecurity Act and the 27000 standard.
