# Ultimate Employee Identity

Are you interested in multi-factor authentication, electronic signing or access control via a mobile app? We offer **all in one single solution**.

Multi-Factor Authentication

eSignature

NEW

Physical Access

## What is ProID Mobile?

ProID Mobile offers an employee-focused, multi-factor authentication (MFA) solution for seamless access to various systems and applications. It also allows users to remotely electronically sign documents, making work processes smoother and more efficient.

Security wise, users benefit from certificate-based identity (PKI), passwordless approach (the use of biometrics rather than passwords) and Runtime Application Self Protection (RASP) security layer that

monitors the current state of the phone and app - making sure that everything is running smoothly.

Our newest feature is the integration of LEGIC Connect SDK.

NEW

## Smartphone – a new smart card?

We are pleased to announce a significant enhancement – the integration of LEGIC Connect SDK. This elevates ProID Mobile's capabilities, allowing not only to securely log into systems and applications and electronically sign, but also access areas and control devices throughout the whole organization.

### Main features:

- Access control (pass through turnstiles, call elevators, unlock doors, clock in or clock out at work, ...)
- Device control (printer, coffee machine, X-ray, CNC machine, ...)
- Login into PC (Windows, macOS, Linux)
- Remote data access – VPN / RDP (Cisco, Palo Alto, Fortinet, OpenVPN, ...)
- Login into 3rd party apps (Google, Microsoft 365, Slack, Atlassian, ...)
- Login into admin apps (CyberArk, F5, Check Point, ...)
- Electronic document signing

...all smoothly achievable through a single app.

Our mobile authentication can be seamlessly **integrated into applications** used in your company. Service availability and scalability is guaranteed through

the secure, high-performance Microsoft Azure cloud architecture. ProID Mobile can be delivered as a **SaaS, on-premise or hybrid solution**.
